

# Meridian is an online compliance and Risk Management System provided by William Martin Compliance.

It enables our clients to have total visibility across their portfolios and sites allowing them to proactively manage, monitor and report via our intelligent software solution.

## CORE FUNCTIONALITY INCLUDES:

1

**Management Information** – all compliance activity is transparently reported, real-time, in high level dashboard views, one click intelligent management reporting or detailed views in customisable dashboards and data grids.

2

**Data Management** – a smart, efficient and easy to use software solution, enabling users to input, store, access and effectively disseminate huge volumes of data and compliance information in one secure place.

3

**Event & Action Tracking** – stores and tracks all periodic and non-periodic events - including inspections, risk assessments, audits and certifications. Resulting remedial actions and tasks can be tracked through to completion with integrated prioritised action management.

**Meridian** is a valuable system for ensuring legal compliance, minimising risk, optimising efficiency streamlining, operational and management practices and hence promoting cost savings and increased defensibility across the business.

## KEY FEATURES
